EXPERIENCE

Twende Mobility — FrontEnd Developer (May 2019 - present)

Developing twende webapp client interface with styled components , Material UI and react/redux. Collaborated on design system implementation from figma/zeplin to building component features . Creating workflows and configuration management tools for CI/CD and also making requests to the RESTful API endpoint.

PROJECTS

Portfolio — [Demo]() [Code]()

- My personal blog where I document everything I learn.

- Built with React,gatsby and graphQL

Nai-blog — [Demo]() [Code]()

- A modern javascript blog site with a similar Netflix theme.
- Built with jekyll and Ruby Gems, the blog site is accustomed with a netlify-cms,SEO and recommendation for articles.

Chic closet — [Demo]() [Code]()

- An online cloth-store built utilizing React and Redux for state management
- Showcases a fully functioning shopping cart with Stripe payment checkout.

Events Api — [code]()

- An event scheduler application, sort of like a mini version of Meetup.com.
- Python web API endpoint built with django and DRF for events attendance.

Taifa — [Demo]() [code]()

- Get information about any country in the world using REST countries API.
- The features are built with React, axios and styled-components.

SKILLS

- JavaScript(ES6+)
